

BUCK POND FARM BREEDING SHED REQUIREMENTS

BREEDING SHED TIMES: 8am & 1pm

BUCK POND WILL NOT REQUIRE A BREEDING SHED FORM

ALL mares presented for breeding **MUST** be vaccinated for the Equine herpes Virus Type 1 (ie: Rhinomune, Pneumabort K, etc) 7-90 days prior to breeding. A statement from your veterinarian must accompany the mare to the breeding shed.

**** Signed contract or Shareholder authorization and **COMPLETED** mare information sheet **MUST** be on file in office prior to Breeding, **No Exceptions** ****

*****Foal Heat and Doubles may be bumped on short notice for first-heat mares.*****

BARREN AND NOT BRED MARES: All barren mares and those not bred last year are required to have a clean culture taken this year. A clean culture certificate must accompany the mare to the breeding shed. A clean culture will be required for **ALL** return covers (Not including doubles). The first three (3) mares bred after an imported mare must be CF tested 15 - 40 days post breeding, see imported Foaling and Barren Mares below.

MAIDEN MARES: **ALL** maiden mares ***must be jumped*** before coming to the breeding shed. The clean culture requirements are the same as stated above for barren and not bred mares. The first three (3) mares bred after an imported mare must be CF tested 15-40 days post breeding, see imported Foaling and Barren Mares.

FOALING MARES: No culture is required for the first cover. A clean culture is required for ALL return covers (not including doubles). Culture must be taken from the current heat cycle. The first three (3) mares bred after an imported mare must be CF tested 15-40 days post breeding, see imported Foaling and Barren Mares.

IMPORTED MAIDEN MARES: In addition to the normal requirements for maiden mares, all fillies of foreign origin (except Canada) which have not been qualified for cover during the previous breeding season are required to have two (2) sets of negative CEM cultures. One set of cultures must be obtained in early estrous; the second may be obtained during a period of 7 to 14 days before or after the culture in estrous. The first three (3) mares bred after an imported mare must be CF tested 15-40 days post breeding, see imported Foaling and Barren Mares.

IMPORTED FOALING AND BARREN MARES: Contact the state veterinarian's office in Frankfort KY (502) 564-3956 regarding testing procedures and acquisition of a quarantine release. A copy of the QUARANTINE RELEASE must accompany the mare on her first trip to the breeding shed. The first three (3) mares bred after an imported mare must be CF tested 15 - 40 days post breeding.

EVA POSITIVE MARES: Any mare which is EVA positive without proof of being sero-negative prior to vaccination must be identified as such when booking the mare and will be bred last in line on any given day.
